

## JEX-5

### TECHNICAL DATA SHEET

Packaging	Code
-----------	------

Gallon	156-10001
5g Pail	156-2956

#### Description:

JEX-5 is a clear liquid with a typical pungent chlorine odour. It is used for general sanitation, disinfecting, and bleaching.

#### Directions:

Miscellaneous Uses: Removes stains and deodorizes toilet bowls, bath, garbage cans, sick rooms, linoleum, woodwork, tiles, counter sinks and refrigerators. Add 125 ml Jex-5 per 5L of water for general sanitation and disinfecting and toilet bowls. Use 60ml of Jex-5 to 5L of dishwater; do not use for silverware and aluminum. Do not mix with toilet bowl cleaner, rust remover, ammonia or acids.

Laundry: Dilute 50ml of Jex-5 to 5 litres of water and add the dilution to wash water before adding laundry. Safe for nylon, orlon, terylene, and all fast colours. Do not use on wool, silk, mohair, lycra, unfast colours or leather.

Food Processing and Beverage Plants: For use as a sanitizer/cleaner on hard surfaces (countertops and processing surfaces) with food contact, make a solution of 40 ml of Jex-5 with 10 litres of water. This solution will have 200 ppm of available chlorine and a rinse with potable water is not necessary. Solutions having a higher concentration of available chlorine will require the surface to have a rinse with potable water. Before rinsing off, the product must be left on for 10 minutes. Avoid contamination of food.

Swimming Pools: Maintain recommended daily levels as determined by testing kit.

#### Safety:

Personal Protection	B
Flammability	0
Health	3
Physical Hazard	1

0 =	Insignificant
1 =	Slightly
2 =	Moderate
3 =	High
4 =	Very high

#### Specifications:

Form	Liquid
Colour	Clear
pH	12.25
Specific Gravity	1.1
